

Frequency Magnets

Here are the ages of people who go to the Little Ducklings class, but some of the frequencies have fallen off. Your task is to put them in the right slot in the frequency table. Nine children and their parents go to the class, and the mean and median are both 17.

Age	1	2	3	31	32	33
Frequency	3		2	2		

Sharpen your pencil

When you’ve figured out the frequencies for the Little Ducklings class, sketch the histogram. What do you notice?
